N;Contains: probable homeobox protein OSH45, splice form OSH42
C;Species: Oryza sativa (rice)
C;Species: Oxyza sativa (rice)
C;Accession: T03874; T03876

(Natl. Acad. Sci. U.S.A. 78:2825-2829(1981).
-!- FUNCTION: Antifreeze proteins lower the blood freezing point.
-!- SIMILARITY: Belongs to the type-I AFP family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Pseudopleuronectes americanus (Winter flounder) (Pleuronectes

Chromosoma 108:491-500(2000).
-!- SUBUNIT: The nucleosome is an octamer containing two molecules each of H2A, H2B, H3 and H4. The octamer wraps approximately 146 bp of DNA (By similarity).
-!- SUBCELLULAR LOCATION: Nuclear (By similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Anopheles gambiae str.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          binding to the B box (5 -CANNTG-3').
-!-SUBBUNIT: Efficient DNA binding requires dimerization with another bHLH protein. Forms a heterodimer with E12/B47.
-!-SUBCELLULAR LOCATION: Nucleus (Probable).
-!-SUBCELLULAR: Contains 1 basic helix-loop-helix (bHLH) domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi;

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
